- Carbon Fiber
- Prepreg
- Paper, Film, Foil

Quickdraft

- Metals
- Food Processing
- Pulp & Paper/Converting

PSC

- Fiberglass
- Food Tempering
- Specialty Drying
- Ceramics

"We all get our hands pretty dirty here. I tell my customers - call me, no matter what it is."

C. A. Litzler Co., Inc.

Litzler designs and manufactures custom industrial systems including Dryers, Carbon Fiber Lines, Tire Cord and Prepreg Machines with hundreds of units in service worldwide. For decades, the Litzler name has meant trust, quality, and committed partnership between our employees and customers.

We are unique in the industry for our combination of knowledge, capability, and a personal touch. Our deep industry experience in engineering and manufacturing lets us create your ideal solution. From the largest custom builds to support for small projects - Litzler will meet your challenges as a trusted partner.

Quickdraft, Inc.

Quickdraft is the industry-leading innovator in Venturi Pneumatic Conveying and Exhaust Systems - with more installations across the material handling industry than all our competitors combined.

Quickdraft systems offer tremendous advantages over standard conveyors and exhausters providing 24/7 reliability for virtually maintenance free, continuous operations while offering numerous operational benefits. Every Quickdraft project is custom designed and built with seamless integration between engineering and manufacturing.

PSC, Inc.

PSC provides Radio Frequency, Microwave and Combination Heating and Drying Systems. We are unique with all of these technologies under one roof.

PSC created the industry standard RF dryer for fiberglass manufacturers around the world. PSC provides cutting edge technology to the food processing industry with pioneering RF and Microwave food tempering that eliminates waste and spoilage.

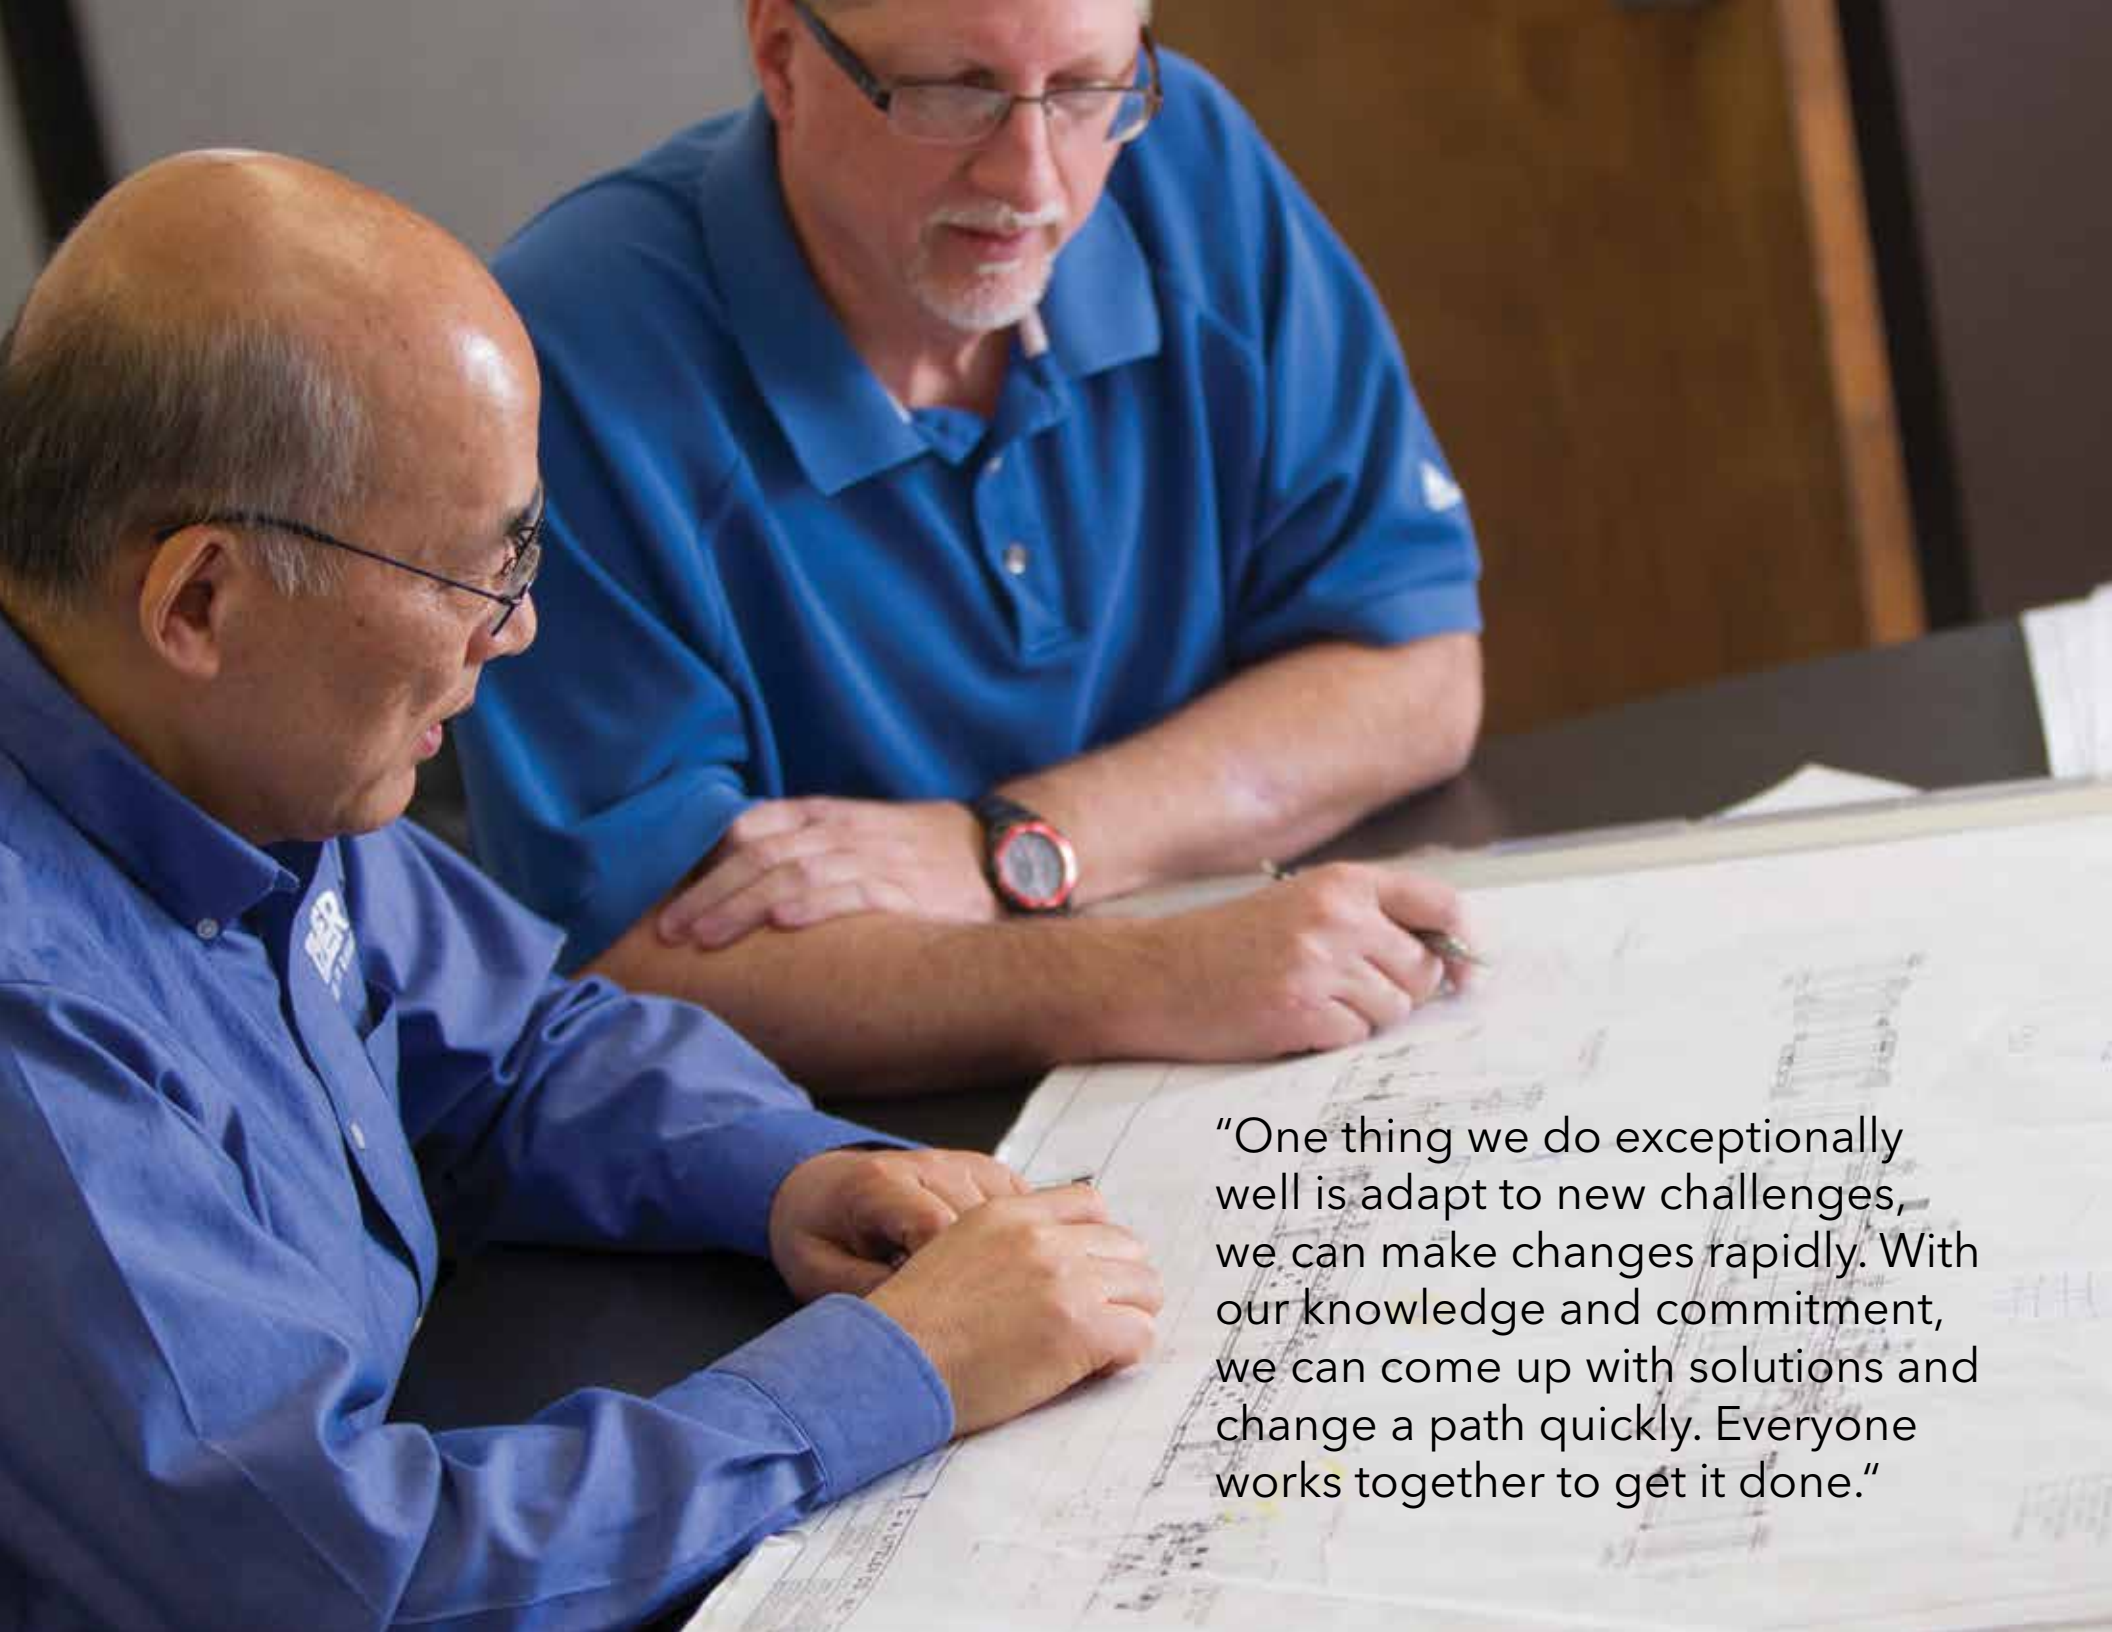

With state of the art laboratory facilities, PSC custom solutions can significantly improve your drying processes.

Litzler Automation

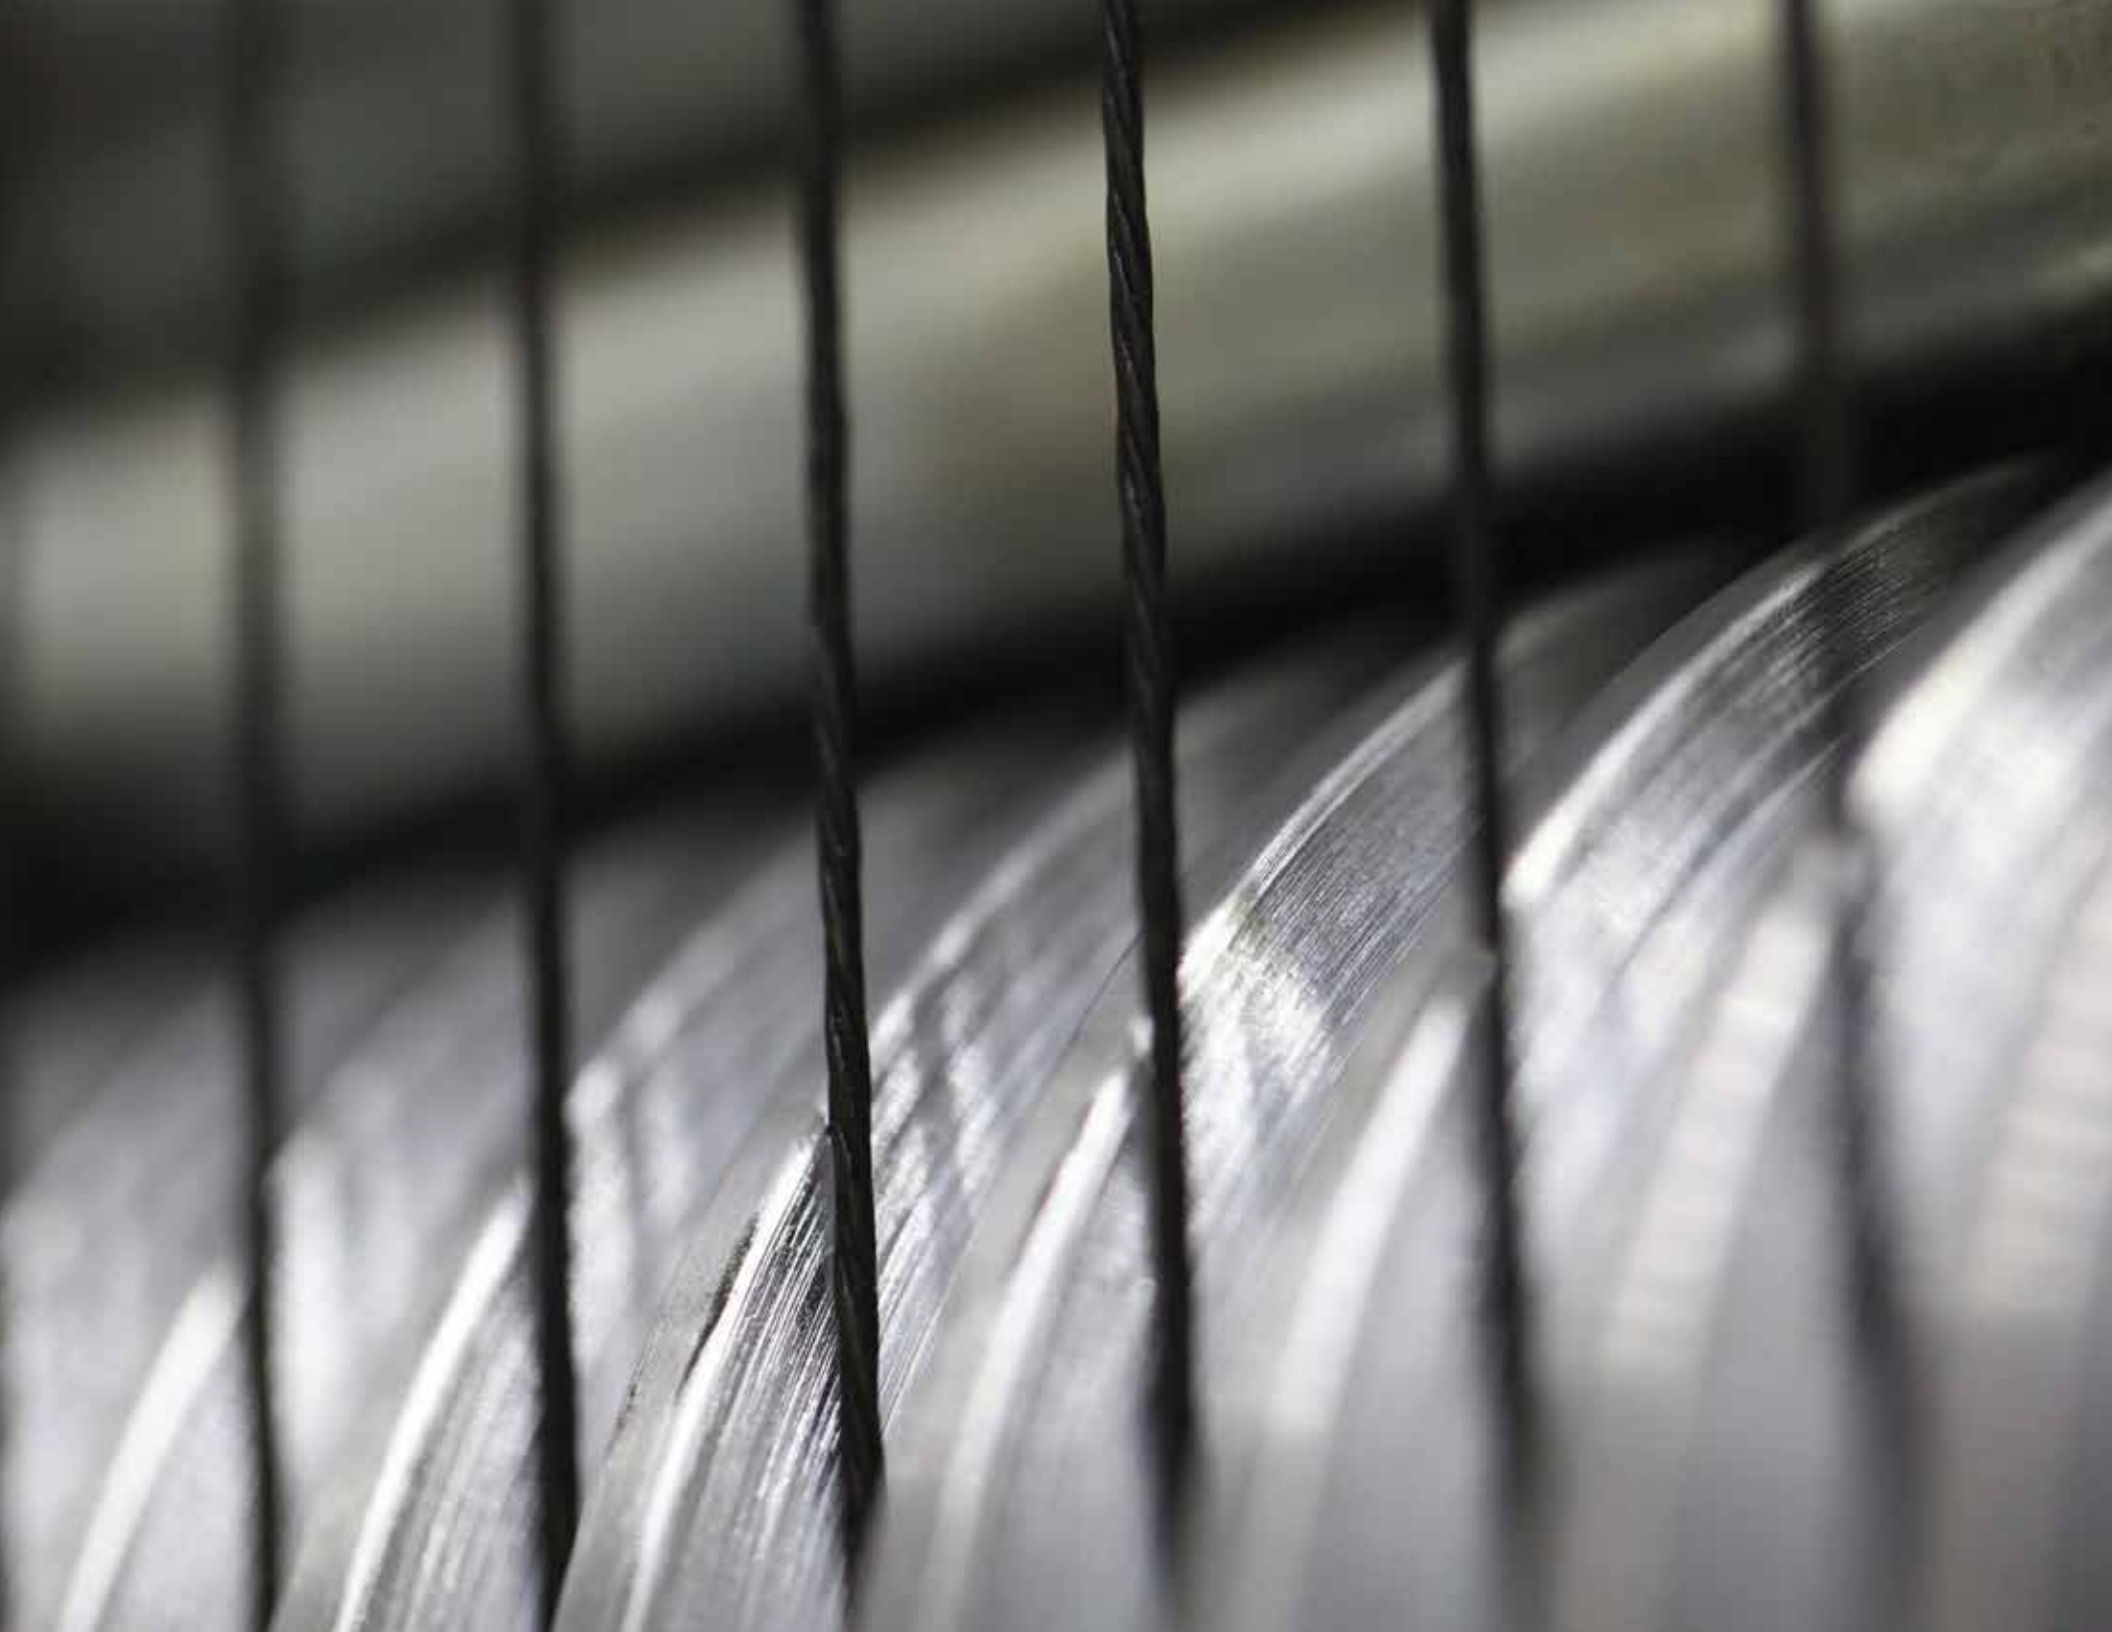

From the largest Tire Cord Treater down to a small retrofit or upgrade, Litzler Automation provides leading-edge control solutions for the entire range of Litzler, Quickdraft, and PSC products. With flexible hardware and software design using all the major brands, Litzler Automation builds the right custom controls for your application.

Litzler Automation solutions are also available as standalone products on existing machines worldwide.

"One thing we do exceptionally well is adapt to new challenges, we can make changes rapidly. With our knowledge and commitment, we can come up with solutions and change a path quickly. Everyone works together to get it done."

Litzler-Foudy

Litzler-Foudy provides Tire Cord, Single End, and Conveyor Belt Machines for emerging markets. We have engineering, assembly, service and support based in our multiple Shanghai facilities. Litzler-Foudy Machines are installed regionally in China and in locations around the world.

Litzler Shanghai

Litzler Shanghai is committed to sales and support for Asian markets providing rapid sales and service responses in-country for all Litzler products.

Why Litzler?

We grew up in the business.

For three generations, the Litzler family has built relationships, becoming one of the most trusted names in each of the industries we serve.

As the company continues to grow, we've added new technologies and parallel businesses to serve you better, building and expanding on decades of accumulated knowledge and skill from successful projects around the world.

We continually work to create the best solutions possible for our customers, working as a partner, not just a supplier. We're here to solve your problems, make your processes run more efficiently and support you and your business.

“Everybody says they solve problems
- Litzler provides the right solutions.”
